## Efficient and Mobile

Synel's field service management solution SYQR offers complete management of mobile employees and reporting via smartphone.

SYQR is leading the way to managing a mobile workforce from any location. The employees can use their smartphone to clock in and out. Managers can track attendance, activities, breaks, absences and extract valuable data anytime-anywhere.

- Use Geo Location with or without Smart QR Code
- Easy to use
- Integrates all main T&A operations in one application
- Fully integrates the use of TimeLOGWeb

### Simple and cost effective solution for remote attendance registration

- Create unique QR code per location and range of dates
- Download smartphone application from Google store or App store
- Scan QR by application to record IN or OUT
- Scan & upload work permits, site induction documentations
- View scans in website and reports
- Record breaks
- Compatible with TimeLOG Web solution

## Health & safety

SYQR can also be used in order to ensure employees use and check their Health and Safety equipment. For example, the checking of "working at heights" Safety Harness. SYQR is not only a flexible management tool for Time & Attendance and employee scheduling, but it can help your business in the long term maintain a high level of Health and Safety standards.
